Commissioning Training

The Nebula DAS is a world-class digital DAS solution. This installation training for Maven DAS and repeaters will ensure you can get the full benefits for your projects. Help your organisation get certified as a partner with Maven Wireless.

✔ Create sectors, allocate services and set RF parameters

✔ Use built-in tools like Spectrum Analyzer remotely

✔ Manage alarms and perform trouble-shooting

Course overview:

This course delves into the setup and commissioning of Maven's distributed antenna system (DAS). Discover how to utilize the NMS for head-end configuration, sector allocation, RF parameter adjustments, and employing Maven's spectrum analyzer, among other functionalities.

Pre-requisites:

- Experience in RF design and measurements

In summary:

○ Set up the Head-end band modules for multiple operators, allocate sectors and configure RF parameters

○ Use auto detection and system tree, set up fiber topologies and perform optical levelling

○ Use Maven's built-in spectrum analyzer, configure the Leaky Feeder Monitoring and

○ Distance to Fault functionality

○ Learn about alarm management and trouble shooting

○ Software and Firmware upgrades Equipment Hands-On
