Installation Training

The Nebula DAS is a world-class digital DAS solution. This installation training for Maven DAS and repeaters will ensure you can get the full benefits for your projects. Help your organisation get certified as a partner with Maven Wireless.

✔ Mitigate interference in Repeater installations

✔ Install head-end equipment, coaxial and fiber connections

✔ Ensure IP66 compliant installations for remotes/repeaters

Course overview:

A comprehensive instruction on the setup of Maven repeaters and the distributed antenna system (DAS). Additionally, it introduces vital radio fundamentals necessary for seamless and interference-free repeater installations. The DAS module spans from the Point of Interface to the intricacies of the Remote units.

Pre-requisites:

- Proficiency in ensuring reliable coaxial cabling connectivity.
- Expertise in maintaining optimal fiber connectivity.

In summary:

○ A product overview of all Maven repeaters and DAS components

○ Off-air repeater installation, including isolation issues, interference mitigation, multi-operator pick-up antennas etc.

○ Mounting of Troop and Exo repeaters

○ DAS Installation of Orion and Helix Head-end units, remote units and fiber connections

○ Coaxial connections for the POI and Remotes

○ AC and DC power options

○ Ensuring IP66 compliant installations
